WORK EXPERIENCE

Senior Software Engineer

Merchize, Vietnam

📅 Nov 2018 - Jul 2022 (3 yrs 9 mos)

- Built a **high availability** and **scalable** eCommerce platform from scratch with **microservice** architecture and Kubernetes, serving more than **1,000+** active stores and thousands of daily orders.
- Reduced costs** by 60% each month by converting the system from single-tenant architecture to **multi-tenant architecture** and using **spot instances** provided by Amazon.
- Collaborated with the SRE team to build fully **automated CI/CD** pipelines for code deployment using GitLab CI.

🛠 Node.js Next.js React MongoDB Redis RabbitMQ EFK
Kubernetes Docker AWS

Software Engineer

Foobla, Vietnam

📅 Sep 2017 - Nov 2018 (1yr 3mos)

Project: SpyBadass

- Built a system to crawl advertising from Facebook and provided valuable ideas to help sellers make decisions better.
- Launched the app to public users after 1 month and had more than 100 paid users after the first day.

Project: SpyAMZ

- Worked as a full-stack developer to develop a research tool, which is providing more than 120 million products updated ranking data daily from Amazon Merch on demand and is used by more than thousands of paid users.

🛠 Node.js React Puppeteer Redis MongoDB ElasticSearch
